Ryan Baltodano

Design Engineer | Product Design & Software Development

Tampa, FL | Open to Relocation | rbaltodano337@gmail.com | (407) 724-5063

ryanbaltodano.com | angrove.app | github.com/rbaltodano

Designer and developer building tools for understanding complex information. Owns interaction design and implementation across native SwiftUI apps and React/TypeScript desktop software. Professional web design experience at PostcardMania; B.S. in Information Science.

Selected Projects

Angrove | Creator, Designer & Developer | Apr 2026 - Present

Private study workspace. iPhone public beta on TestFlight; native Mac app in development.

- Created the Figma visual and interaction system and implemented SwiftUI experiences for source-backed conversations, contextual definitions, and a persistent semantic map of saved ideas.
- Built native iPhone and Mac interfaces around shared design-system and application code, including spatial study Boards on Mac.
- Integrated on-device generation and source retrieval with Core ML embeddings, citation navigation, and encrypted local storage; conversations run without a model server.
- Evaluated optional model reasoning across 80 cases: both settings passed 74/80 while reasoning roughly doubled latency; kept it off by default.

inVectus | Creator, Designer & Developer | Oct 2026 - Present

Local-first research desktop app in development; validated locally on macOS.

- Designed and built React/TypeScript workflows for importing collections, exploring research gaps on an interactive map, and reviewing supporting evidence in a Tauri desktop app.
- Separated gap bookmarks from review decisions, preserving saved evidence and notes across rescans; refined navigation and layouts for narrow workspace panes.
- Connected the interface to shared Rust engine crates for local semantic search and resumable, cancellable indexing; made collection scope and approximate assessments explicit.

Experience

Web Designer | PostcardMania | 2024 - Present

Design and deliver custom, responsive client websites, translating business requirements into individualized layouts and managing client-facing delivery deadlines.

Front-End Web Development Intern | Cloud Carpenter | 2024

Designed and built responsive client websites and interactive features using HTML, CSS, JavaScript, and PHP in collaboration with a development team.

Customer Service Staff | Publix | 2021 - Present

Handle cash operations, reconciliation, and daily bookkeeping alongside a professional design role.

Skills & Technical Experience

Design: Figma, interaction design, design systems, responsive layouts, visual identity

Frontend & apps: React, TypeScript, HTML, CSS, JavaScript, Swift, SwiftUI, Tauri

Engineering: Rust, Python, Git, SQLite, DuckDB, LanceDB, PHP, MySQL

AI & search: On-device model integration, semantic search, vector embeddings, retrieval-augmented generation, evaluation, Core ML, LiteRT-LM

Education

B.S. in Information Science | University of South Florida | 2023

Concentration in Information Security
