Ryan Baltodano

Product Design | Software Development

Tampa, FL | Open to Relocation | rbaltodano337@gmail.com | (407) 724-5063
angrove.app | Angrove case studies | github.com/rbaltodano

Product-minded developer and designer building Angrove, a free, private study app that runs entirely on the iPhone. Owns product design, system architecture, and evaluation, with a focus on thoughtful interactions and reliable on-device performance. Professional web design experience at PostcardMania; B.S. in Information Science.

Featured Project

Angrove | Creator & Product Developer 2026 - Present

Private iOS study app for philosophy and theology, available in open beta on TestFlight.

- Created the Figma visual and interaction system and guided SwiftUI development for conversation branching, contextual definitions, and persistent study history.
- Designed on-device semantic search using Core ML embeddings, bundled source passages, and citation and named-source lookup.
- Designed embedding-space clustering for Insight Tree and weighted Midpoint blends to connect related ideas across study sessions.
- Designed a Python/FastAPI development backend with structured-output validation, priority-aware generation scheduling, and SQLite persistence.
- Ran an 80-case evaluation of optional reasoning: both settings passed 74/80 cases, while enabling reasoning roughly doubled latency; kept it off by default.
- Investigated simulator and physical-device performance constraints, diagnosed GPU allocation failures, and documented runtime tradeoffs.

Experience

Web Designer | PostcardMania 2024 - Present

Design and deliver custom, responsive client websites, translating business requirements into individualized layouts and managing client-facing delivery deadlines.

Front-End Web Development Intern | Cloud Carpenter 2024

Designed and built responsive client websites and interactive features using HTML, CSS, JavaScript, and PHP in collaboration with a development team.

Customer Service Staff | Publix 2021 - Present

Handle cash operations, reconciliation, and daily bookkeeping while maintaining a concurrent professional design role.

Skills & Technical Experience

Design & web: Figma, product and interaction design, design systems, HTML, CSS, JavaScript, PHP, MySQL

Application development: Swift / SwiftUI, on-device integration, performance evaluation, technical documentation

System design: Structured-output contracts, generation scheduling, FastAPI and SQLite backend architecture

Applied Linear Algebra: Vector embeddings, cosine similarity, normalization, nlerp, multidimensional projection

Search & model integration: Semantic search, retrieval-augmented generation, model evaluation; Core ML, LiteRT-LM, MLX

Education

B.S. in Information Science | University of South Florida 2023

Concentration in Information Security
